

For suppliers/manufacturers. Noklus' evaluation of rapid tests for detection of antibodies against SARS-CoV-2.

This is a registration form for suppliers and manufacturers in order to request participation in Noklus' evaluation of rapid tests for detection of antibodies against SARS-CoV-2. The reports from the first two evaluations are published at <https://www.noklus.no/koronavirus-covid-19/>. The objective is to investigate performance characteristics of the rapid tests, and to evaluate the user-friendliness of the tests. The evaluation requires 200 tests free of charge.

Please submit the form to noklus@noklus.no together with the package insert (IFU) of the test kit as soon as possible. Applications will be considered continuously.

Please complete the table below with information regarding your measurement system

Full name of the measurement system	
Name of the manufacturer	
Name of the supplier(s) in Norway	
Name of contact person and e-mail	
Date for CE-marking	
Measurand	
Method	Qualitative <input type="checkbox"/> Semiquantitative <input type="checkbox"/> Quantitative <input type="checkbox"/>
Tests per kit	
Date for when the kits will be available for the evaluation	

Results from the evaluation will be published in freely available reports online and may be used in scientific publications.

Please note that registration is no guarantee that your test will be included for evaluation!
